

Burial Administrator's Report – September 2022

Interments

To date we have carried out a total of 50 interments. 28 were ashes interments. 8 were burials in the older part of the cemetery. 14 were burials in the cemetery extension.

We have 11 interments left in the cemetery extension for the rest of this year which is roughly 3 per month. Hopefully we will be ok for the rest of the year but are monitoring the situation and once we reach 20 interments, we will inform the Committee and contact local undertakers to advise them of the situation.

Pond

Our health and safety advisor is due to visit us in early October. We will ask him to look at the pond at the cemetery and confirm whether it can be reopened subject to the netting and signage being adequate. We received a lot of positive comments about this area so it would be nice to have it available and used.
